

Getting Started Guide

A simple, step-by-step guide for parents — sign up, set up your child, and start practising in a few minutes.

1 Create Your Parent Account

- 1 Open the app and tap **Sign up**.
- 2 Enter your email address and choose a password (at least 8 characters).
- 3 Check your email for a confirmation link and tap it to confirm your account.
- 4 You're in! This is your parent account — you'll use it to manage everything.

2 Set Up Your Child's Profile

- 1 On your parent dashboard, enter a **nickname** for your child — not their full name, just something they'll recognise (for example, "Jellybean").
- 2 Choose a **4-digit PIN** and type it in twice to confirm it.
- 3 Tap **Create profile**.
- 4 You'll see your child's own practice link — bookmark this on their device. They'll use it, together with their PIN, to log in by themselves.

Tip: Write the PIN down somewhere safe in case your child forgets it.

3 Your Child Logs In

- 1 On your child's device, open the bookmarked practice link.
- 2 They'll see a "Hi [nickname]!" welcome — enter the 4-digit PIN.
- 3 Tap **Start practising**.

4

Generate Practice Questions

- 1 Tap **Practise by topic**.
- 2 Choose a subject — Verbal Reasoning, Non-Verbal Reasoning, English, or Maths.
- 3 Choose a specific topic, or pick **Whole subject** to cover everything.
- 4 Choose how many questions, and when answers should be revealed.
- 5 A set of questions appears, ready to answer.

5

Generate a Mock Paper

- 1 Tap **Take a mock paper**.
- 2 Choose a subject.
- 3 Leave the 60-minute timer on for exam practice, or turn it off to go untimed.
- 4 Tap **Start mock paper**.
- 5 A complete paper is created for your child, just like a real exam.

Tip: Mock papers work well as a timed weekend activity — try a quiet room and a clock.

Need more help? If you get stuck at any step, contact us at prep11.uk@gmail.com and we'll be happy to help.

Screen names and buttons may be updated from time to time as the app improves — the steps above will stay broadly the same.
